Label Design Software: _____ Version ___ Operating System _____

NOTE: Die-to-sheet edge registration in die cutting varies from .0313"up to .1875". Your copier, printer or press has additional die-to-sheet-to-art registration. Design your label art so that it will not appear off center if the art shifts on the dieline. Borders on labels and tight registration are best avoided on inkjet and laser printed labels.

Design Specifications

Radius Corners
